

CSS Styling Assignment

Name: Hayden Pack

Teacher: David Retterer

Subject: Net-Centric Computer Programming

Date: 1/31/2017

Introduction:

The assignment as given in class is to go to W3Schools and learn about CSS. After which we were to use what we learned to create a webpage with css styling. Finally, we were to write this paper on our website and turn it in for class.

Body:

To go about completing this assignment I first went to W3Schools and found their css tutorial. After which I wrote down in my notes the

parts that I found interesting and that I would want to use. From there I implemented many of those and a few things that were taught in class and came up with this text box which uses many different css styles. The image is the result of the multiple different commands that I added to my css file.

Conclusion:

This assignment was a good way to get learning about the different things that can be done with css. It also led me to W3Schools which is a helpful website for learning about css. Thus I believe that this was a good assignment and am likely to continue with W3School's tutorial and see what else it has.

Code: css.css:

```
#body{  
    border-left:6px solid blue;  
    border-right:6px solid mediumseagreen;  
    border-top-style:dashed;  
    border-bottom-style:dotted;  
    background-color: aqua;  
    font-family: sans-serifs, Times, serifs;
```

```
text-decoration: underline;  
width: 600px;  
text-align:center;  
margin:0 auto;  
border-width: medium;  
border-radius: 5px;  
font-size:18px;  
text-shadow:3px 2px red;  
text-transform:capitalize;  
}
```
